Summary

Results-driven Full-Stack Software Engineer with 4+ years of experience architecting and developing scalable applications across FinTech and Travel domains. Specialized in modern frameworks (Next.js, React, NestJS, Python) and robust system architecture utilizing message brokers (Redis, RabbitMQ) and containerization (Docker). Proven track record of building complex, high-performance systems—including a full-scale trading platform—while leveraging CI/CD pipelines and testing (Jest) to ensure seamless delivery and reliability within international cross-border teams.

Skills

Frontend: Next.js, React.js, TypeScript, JavaScript (ES6+), Tailwind CSS

Backend: NestJS, Python, Flask, Express.js, RESTful APIs

Databases & Messaging: Redis, RabbitMQ

DevOps & Testing: Docker, CI/CD, GitHub Actions, Jest

Architecture & Networking: System Architecture, CCNA Certified (Enterprise Networking & Security)

Tools & Methodologies: Git, Agile/Scrum

Experience

VBOOKING | FULL STACK DEVELOPER

DUBAI, UAE (REMOTE) | DEC 2025 – PRESENT

- Architecting a scalable travel booking engine using NestJS and Next.js, focusing on high-availability and performance.
- Implementing containerization using Docker and automated CI/CD pipelines via GitHub Actions, reducing deployment time by 20%.
- Integrating RabbitMQ for asynchronous task processing, ensuring system stability during peak traffic periods.
- Collaborating with a cross-functional team in Dubai to deliver user-centric features, improving booking conversion rates by 7%.
- Optimized complex database queries and integrated Redis caching layers, drastically reducing API latency and accelerating search retrieval times for travel itineraries.

MUTQINAI | FRONT-END DEVELOPER

DUBAI, UAE (REMOTE) | SEP 2024 – SEP 2025

- Delivered 10+ scalable web solutions for various clients, including high-converting marketing landing pages using Next.js and Tailwind CSS, achieving a 100% client satisfaction rate.
- Engineered a real-time live football scores web application and automated data-fetching workflows using Python and Telegram bots, significantly reducing manual data entry time.
- Developed custom internal desktop applications utilizing Python and Tkinter to streamline GUI-based operational workflows for clients.

ADVERTISING AGENCY (CONTRACT) | FRONTEND ENGINEER

CHICAGO, IL, USA (REMOTE) | MAR 2024 – SEP 2025

- Engineered and optimized high-conversion landing pages for critical marketing campaigns using Next.js, implementing advanced techniques (code-splitting, lazy loading, and caching) to exceed Core Web Vitals, SEO, and accessibility standards.
- Architected scalable, maintainable UI solutions applying clean architecture, reusable components, and atomic design principles.
- Collaborated cross-functionally with designers and marketers to align UI/UX with campaign goals, consistently achieving lightning-fast page response times as low as 500ms.

3TEEB | FULL STACK DEVELOPER

SAUDI ARABIA (REMOTE) | 2023 – 2024

- Led the end-to-end development of a high-frequency trading platform (similar to Binance), handling complex financial logic and real-time data.
- Optimized backend performance using Django and Redis for caching, resulting in an 80% reduction in API response times.
- Developed a dynamic, responsive dashboard with Next.js, ensuring sub-second updates for live market prices and user portfolios.
- Enhanced system security by implementing robust authentication and authorization protocols for financial transactions.

INTERSHIPS

APRC | SOFTWARE ENGINEER INTERN

WASHINGTON DC, USA (REMOTE) | 2024

- Analyzed cross-departmental software workflows, focusing on optimizing data processing pipelines and implementing access control mechanisms to enhance system security.
- Collaborated with senior IT professionals to monitor large-scale infrastructure operations, gaining hands-on insights into network management, databases, and cybersecurity protocols.

SIDI KERIR PETROCHEMICALS CO. (SIDPEC) | INDUSTRIAL AUTOMATION INTERN

ALEXANDRIA, EGYPT (ON-SITE) | 2023 – 2024

- Investigated enterprise-level industrial software architecture, focusing on the seamless integration of IT networking, databases, and automated control systems.
- Evaluated system security practices to ensure data integrity, high availability, and protection within critical, large-scale industrial environments.

Education

PHAROS UNIVERSITY IN COLLABORATION WITH KTH ROYAL INSTITUTE OF TECHNOLOGY

BACHELOR OF COMPUTER ENGINEERING / 2020 – 2025 (EXPECTED)

- Dual-Degree Program: Studying a comprehensive curriculum from both Pharos University (Egypt) and KTH Royal Institute of Technology (Sweden).
- Key Focus Areas: Software Engineering, Distributed Systems, Network Security, and Cloud Computing.

Certifications

- CCNAv7: Enterprise Networking, Security, and Automation – Cisco Networking Academy (2023)
- CCNA: Switching, Routing, and Wireless Essentials – Cisco Networking Academy (2023)
- CCNA: Introduction to Networks – Cisco Networking Academy (2022)
- React.js Hooks, Redux, State, and Router – Udemy (2022)
- Complete Flutter & Dart Development – Udemy (2021)

LANGUAGES

Arabic: Native

English: Fluent (Professional Working Proficiency)
